Continuation of Hildreth's History-Vol. IV.

LARPER & BROTHERS will Publish
on SATURDAY, Feb 15.
THE HISTORY OF THE UNITED STATES OF
AMERICA. from the adoption of the Federal Constitution
to the end of the Sixteenth Congress.

By RICHARD HILDRETH.
In three Volumes.

Vol. I—ADMINISTRATION OF WASHINGTON.

Evo. muslin, price \$2: sheep, \$2.25; half calf, \$2.59 per vol.
It is the object of this work to give a complete and detailed account of the United States in their social, political,
intellectual, and economical aspects during the exceedingly
aghtsted and interesting period of the first generation succeeding the adoption of the Federal Constitution.

The three volumes, by the same author, heretofore published, on our colonial and revolutionary history, must be
considered as merely an introduction to these, in which
both evens and individuals are portrayed on a much larger
scale, in due proportion to their nearness and more decided
bearing on our present affairs.

This period of thirty two years not only possesses a great
deal of dramatic unity, but also admits of a division into
three acts, each a sort of whole by itself, and each embraced
in a separate volume.

The first volume, now presented, begins with a full account of the state of feeling and prevailing views in the
different States at the moment of the organization of the
new national government, showing the origin of that divisice of parties by which the country ever since has been
more or less agitated, and the echo at least of which still
resounds in our ears. The full narrative, now first given,
of the debates and proceedings of the first and second
Congress, (including full details as to the Executive, Judicial, and Financial systems then adopted, and, with some
slight variations, ever since continued.) completely lays
open the foundations of our present hear adopted to
Constitution than on the practical interpretation and applicallon given to it.

Not is less attention paid to the exterior relations of the

remarkable transactions in the particular states, furnish interesting episodes to this narrative.

The first volume concludes with a full account of the relations with France, especially of the extraordinary proceedings of Monroe as Embassador to that country, his recall ir consequence, and the appointment of C.C. Pinckney to succeed him, among Washington's last acts, just as the headship of the Government was passing to John Ad-

The materiais for these three volumes have been almost entirely drawn from original documents, published collections of letters, scattered pamphlets, and files of newspapers. No other continuous narrative exists of any part of the period (with the single exception of the last volume of Marshall's Life of Washington) of any considerable value to the general reader. Even the reports of Congressional debates, abstracts and extracts from which form so valuable a part of these volumes, nowhere exist in any collected form, but only in scattered volumes of newspapers, nowhere to be found except in a few public libraries, and very seldom complete any where.

"The best Essays since Addison's 'Spectator." THE LORGNETTE; Or, STUDIES OF THE TOWN. Third Edition Now Ready.

Two volumes, eleganty bound, with interactions, of Darley. Price \$1.25 per volume.

"The Lorgrette is to New York society what Shakspers must the stage to the world. It farly holds the mirror up to nature. The folles, voce, and amusements of the great metropoles are portrayed not caractured, with an accurate mand. He teaches, and we have reason to believe with success, that life has nobler aims than those reached of our being; instfulness, not to cursalves alone, but to those around.

Two volumes, elegantly bound, with illustrations,

end of our being; neefulness, not to curselves alone, but to those greated.

Of the sparking brilliant style of the work, its wind pictures of real life, and its keen sarcasm, our praise cannot but seem imperdient. We hope not to be thought extraragent in ranking it at the head of its department in literature.

"Their finish of style, delicacy of wit, undependence of thought, broad catholic spirit, and the higher sloquence on their occasional micralizing, are not to be found in combination, it any other works of their kind, this side of the water.

"We find the Second Series fully up to the mark of the First and having read them once, we shall put the two handsome volumes side by side, in our library, with Addison's Speciator, which they more nearly approach in chasin elegance than any modern skatches we wot of.

The wide-sortead popularity of the Lorgoutie readers caloginm uncreasary. The work is desired to take the pince in our libraries by the sole of the Special cannot the cases. The artist sprears to have ranght the spirit of the author, whose quiet, penal years in have ranght the spirit of the author, whose quiet, penal years to have ranght the spirit of the author, whose quiet, penal year of salar never reaches to the grussepte carcature, but preserves a reality, a trutifulness in his pictures of sicility, that it west his burderations with a double-charm."

CHILDREN'S FEET—A WORD TO aware, are deformed from relaxation of the planet muscles—from which the foot, particularly the instep derives its strength and perfect form—during the early years of walking, leading to malformation of the feet, lameness and misery through life. The difficulty admits of easy and prompt remedy, and as the celebrated Surgeon, Amesbury of London, save.

masses can be sensured early and certacily, by properly sustained the phaset arch.

The subscriber, during the long period he has been engaged in the manufacture of Boots and Sloes, has had his attention repeatedly drawn to this subject by the complaints of children suffering in the instep, ankle and leg from the relaxation of the above named muscles of the foot. These complaints led him to devise—long before hearing an opin ion from any source—some plan to make the boot or shoe support the instep of the foot. both of grown persons and children. His well known "STEEL SPRING SHANK" for men's boots and shoes was the first result of this devising, and has added to the pleasure and comfort of many thousands. He has since perfected a "Spring Shank" for children's shoes, which holds the basic pirm, strengther a the whole foot, and a nothing to the balk of the shoe, and but slightly to us price.

This "CHILDREN'S INSTEP-SUPPORT S.c. passed between the soles of the shoe has been thoroughly tried in several cases of weak have feet in this City, with perfect success and to the gratification of all concerned. This fact has manny influenced the subscriber in selecting this method of unlating more widely and particularly known what he believes will prove, whenever tested, a breasing to children and, faurilles. Medical men, in whose families it has been introduced, and who have examined its merits, have, unsolicited and with unanimity, expressed their entire favorable opinion of it.

is has been introduced, and who have examined their cultive fay orable opinion of it.

Stafford Bell, M.D., of this City, having used it in his family, thus writtes:

"Among the ham prescribes I have seen used, none could so near perfection as the Paper Shanks" of Mr. Lorin Brooks. With those here is the postive continued but the manches are target to properly peakers their families, while the bones and signments are applicable in their material prescribes are target unaity and positively in their material prescribe. It may not large the "and prescribe their families," while the bones and signments are applicable, the case they have produced great besent.

The fastimotry of hundreds of medical men and well-known citizens might be adduced if the subscriber thought accumulated evidence necessary. He familia differently, and having no desire beyond securing the attention of those who may wish to better, their children, who can easily and without cost examine his invention, accepting it or not at their pleasure, and who be respectfully invites to such examination.
